LORRY CRANES

BARRIER RIGS AND BESPOKE BODIES

Barrier Rigs, the multi-purpose vehicles widely used by highways contractors, are a great example of how the T H WHITE Lorry Cranes division can cater for individual customer body building requirements, no matter how complex.

Perhaps because T H WHITE is the UK importer of Palfinger cranes, the company has earned a justified reputation for installing these premium high-tech cranes on a wide range of chassis. More recently, Orteco pile drivers have been added to the line-up and our customers are generally well aware of the service we offer in fitting these to all kinds of vehicles. Less well-known is the

fact that T H WHITE operates state-of-the-art body building workshops where our skilled technicians will build any kind of body to suit your application.

Taking the Barrier Rig example, here is one truck that does it all. Fitted with a Palfinger crane it gives

Top and above Barrier Rig – the one truck that does it all

users the ability to lift and manoeuvre loads and remove roadside equipment and debris. The Orteco pile driver can both drive in and pull out posts, while the steel dropside truck body at the rear provides a safe area for operatives placing and collecting cones for instance, as well as a loading bed for equipment. Other options, such as

winch, work lighting, hole hammers and borers can be added as required, while finished vehicles can be branded and labelled to your specification.

The bodywork options offered by T H WHITE are almost limitless. Literally working from the ground up, our technicians start with the bare chassis and build the bodywork exactly to your specification. We can incorporate steel, alloy, GRP or cage-style drop side sections, safety rails, walkways, central stairs, water tanks, storage compartments, electrical systems and a whole range of specialist designs to meet individual requirements.

What's more, our body building service is not restricted to vehicles fitted with cranes – we will happily design and build flatbed or dropside bodies of any style for lorry or small truck chassis.

The benefit of the T H WHITE approach for the customer is a true one-stop-shop service where we will fit a crane and build the bespoke body, fully kitted out with all necessary accessories, and then type-approve it.

If you would like to talk through the options and learn more about how we can build exactly the right vehicle for your business, call our specialist body building team on 01380 722381.

ENTER NOW FOR AVEBURY PLOUGHING MATCH

Held annually for over a century – apart from a few bad weather years – the Avebury & District Ploughing Match has become a firm favourite in the local agricultural calendar and entries are now invited for the 2017 event.

Scheduled to take place this year on 23 September at Galteemore Farm (N Hues & Sons), Beckhampton SN8 1QJ, the match will have classes to test various skills using different makes and models of tractors and ploughs.

All potential competitors within 15 miles of the venue are eligible to enter, but must be aged 14 or over and be competent on a tractor. Ploughing commences at 9.30 and will finish at around 12 noon.

The closing date for entries is 31 August and the entry form can be downloaded from www.aveburyploughingassociation.co.uk.

Thanks are due to the Committee for organising the event and to David Hues and his family for agreeing to host it.

GROUP

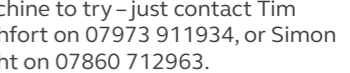

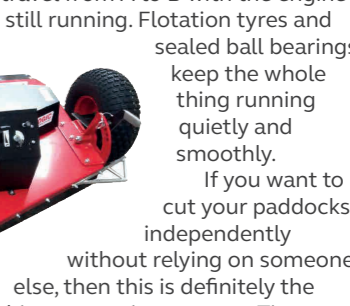

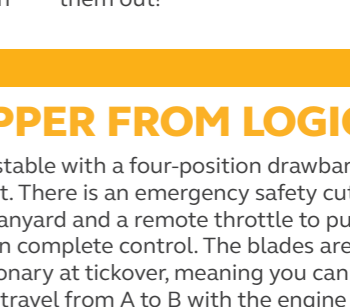

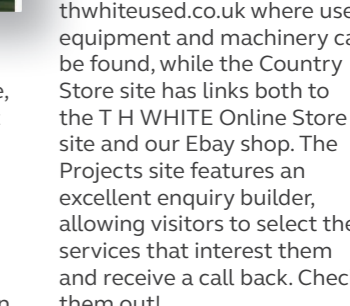

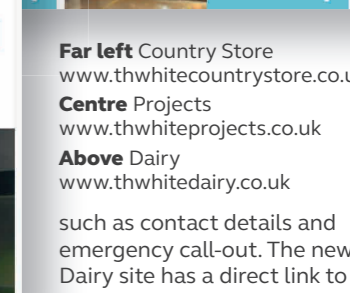

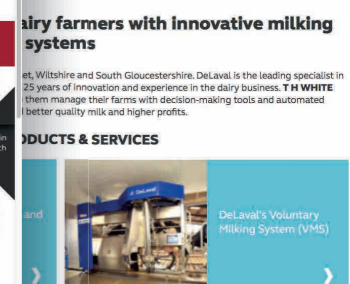

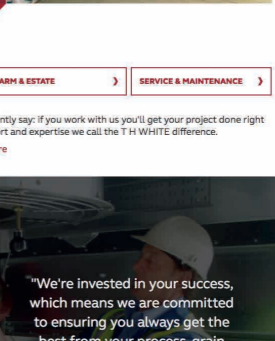

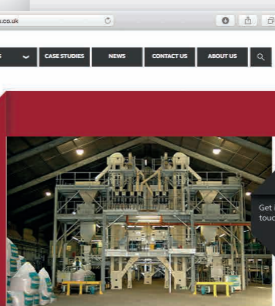

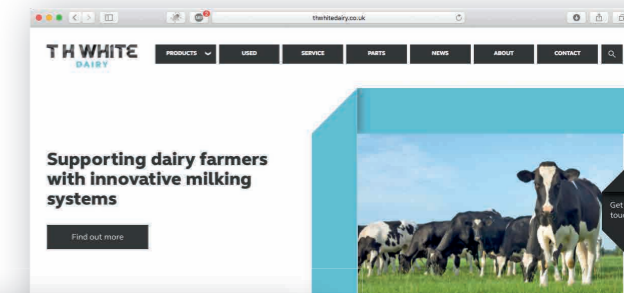

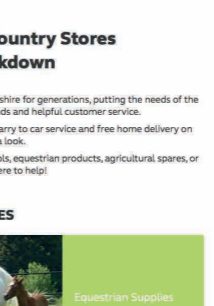

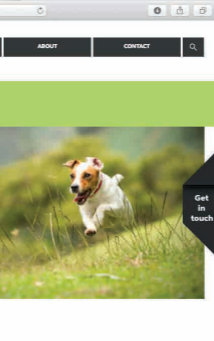

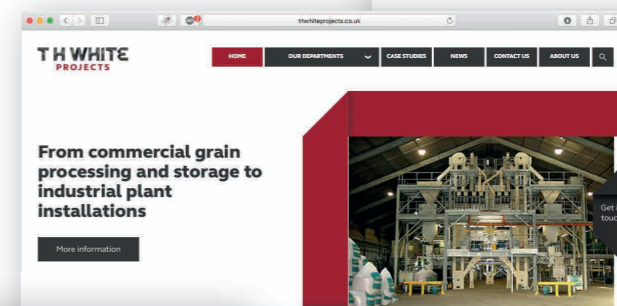

THREE MORE WEBSITES PRESENT GROUP DIVERSITY

T H WHITE's online offering has been further enhanced in the last month by the launch of three new websites – for the Dairy and Projects divisions, as well as the Country Store.

While presenting the activities, products, services and offers from each part of T H WHITE's business, the new sites act as satellites to our main Group website (www.thwhite.co.uk), not only sharing a common design theme but also interlinking with each other and the main site, making it easy for users to navigate through all our divisions

in an intuitive way.

The transformation of T H WHITE websites began with the launch of our new brand and the new sites take advantage of the latest web

Great products, friendly service, super bargains – pop in and see

Discover your local T H WHITE Country Stores in Marlborough and Knockdown

As a family and staff owned business, we have been serving Wiltshire and Gloucestershire for generations, putting the needs of the local community first. You can depend on us for a choice of quality brands and helpful customer service.

With extended opening hours, ample free parking, knowledgeable friendly staff, a carry to car service and free home delivery on orders above £100, we are definitely worth a look.

Whether you are looking for clothing, wellies, gardening products, mowers, power tools, equestrian products, agricultural spares, or household and DIY supplies, call in today, we're here to help!

AGRICULTURE

SKY DRILL ROADSHOW
An impressive number of local farmers attended the T H WHITE Sky seed drill roadshow at the end of June, run in conjunction with Opico.

Held at Upper Farm, Cherhill, Calne (courtesy of D W Pickford & Son Ltd), the event provided demonstrations of no-drill tilling and cover cropping. It was greatly appreciated by all and there has been much positive feedback.

EASY-START UTV/ATV TOPPER FROM LOGIC

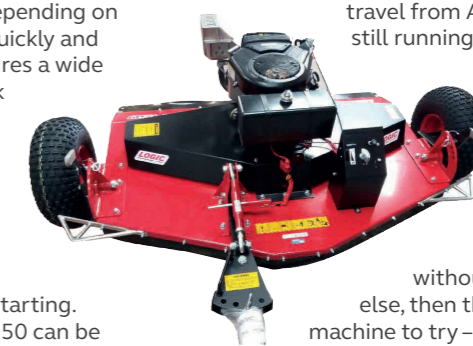

The latest addition to the Logic range of topping mowers is the Electric start TRM150 rotary mower.

This is an impressive, tough machine for cutting unruly paddock grass at up to 10kph, depending on growth, cutting quickly and efficiently. It features a wide 1.5m cutting deck with three belt driven blades and powered by a reliable twin cylinder Briggs and Stratton 16hp engine with turn key electric starting.

The Logic TRX150 can be towed behind any vehicle, compact tractor, UTV or ATV and is height

adjustable with a four-position drawbar offset. There is an emergency safety cut-out lanyard and a remote throttle to put you in complete control. The blades are stationary at tickover, meaning you can travel from A to B with the engine still running. Flotation tyres and sealed ball bearings keep the whole thing running quietly and smoothly.

If you want to cut your paddocks independently without relying on someone else, then this is definitely the machine to try – just contact Tim Rochfort on 07973 911934, or Simon Knight on 07860 712963.

KEEPING YOU SAFE & SECURE

Access Control systems

From simple pinpad and swipe units to fingerprint biometric entry modules we can control access to any size of property, including those with restricted areas or secure rooms.

Intruder Alarms

From bells only to fully policed, monitored systems. We can install the right system tailored to you or your insurance company's requirements. Already have a system? T H WHITE can carry out your annual tests, with a friendly face and a service you can trust.

Fire Alarms

Business owner? Landlord? Health and safety manager? Our surveyors are fully accredited in system design and can work with you on any project to make sure you comply with the latest regulations.

Fire Extinguishers

We offer supply and maintenance of fire fighting equipment, together with honest and accurate advice to keep you safe and compliant with the latest regulations. We also offer safety signage and accessories such as cabinets, vehicle boxes and escape ladders.

CCTV & IP Cameras

For security, health and safety or machinery monitoring, we have the system for you. From fully HD conversions of existing systems to IP set ups we can future proof your CCTV installation. Coupled with our smart phone technologies you can monitor your system from anywhere in the world.

Electric Gates & Barriers

From bespoke domestic style electrical gates to commercial barriers and bollards. Physical security combined with security systems enhance the protection of sites and stop would-be intruders in their tracks.

ENERGY

IMPROVE YOUR SOLAR GENERATING YIELD WITH PV PANEL CLEANING

The UK now has over 750,000 solar installations and people have witnessed first-hand the stable income and savings they can generate. As the years go by solar panels will continue to generate and like every piece of infrastructure there are times when they need a check up and a clean to keep them functioning at their highest potential.

T H WHITE Energy specialists have been involved in thousands of solar projects and after seeing an increase in demand from customers for maintenance services we have now expanded our activities to include solar panel cleaning.

Our trained staff use specialist cleaning equipment which we have taken time to test and review to ensure it complies with solar panel manufacturers' warranty requirements. Solar panels come with a 25 year performance guarantee, provided they are operated and used in the correct approved way.

Why clean solar panels?

As part of our annual inspection we undertake a visual inspection of systems and in the first year we recommend checking quarterly to ensure that dust and dirt build up is monitored. Some businesses have very high levels of dust which may mean cleaning the panels more than once a year. Similarly, where panels are installed in a wooded area there may be leaf debris build-up which can also have a negative effect on solar PV performance.

Clients who have had arrays cleaned within the last year have experienced yield increases of more than 10 per cent following the process. We are able to clean all sizes of roof-mounted solar systems except for those on extreme high-rise buildings. We can also clean small to medium ground-mounted systems. Depending on the size of building we can either carry out the work from ground-level, or attached to 'mansafes' and harnesses, or via other mechanical access equipment.

If you have a solar PV installation which could benefit from cleaning, all we need to know is the system size and approximate size of the building in order to provide you with a quote. If there are any factors affecting access requiring special equipment we may choose to visit the site in order to give an accurate quote.

For more information and advice on the most effective maintenance regime, call T H WHITE on 01380 726656.

PROJECTS

CUTTING EDGE TECHNOLOGY

The new T H WHITE Projects building, Nursteed Road, Devizes.

Since T H WHITE Projects moved across from William Road to the new purpose-built 1250m² factory and offices within the main T H WHITE Group complex in October last year the division has seen a significant increase in the amount of fabricated steelwork, components and products being produced in our new Nursteed Road manufacturing facility.

Recent investment in machine tool technology has resulted in the installation of a new plasma cutter to assist the team in faster production of precision cut and profiled steel plate components for use on the numerous fabricated steel projects going through the production area.

T H WHITE Projects benefits from highly skilled in-house fabricator-welders whose capabilities enable the team to adapt and accurately manufacture a variety of bespoke

steelwork for numerous applications, which can be confidently addressed and produced within strict tolerances and specifications.

The new plasma cutter augments the capabilities of the shearing, pressing, folding and cutting equipment, further improving the operational efficiency on the shop floor. The plasma cutter can cut both mild steel and stainless steel up to 20mm thick, achieving a high degree of accuracy and finish.

The Nursteed Road manufacturing facility is set up for production of bespoke steelwork comprising plate and member sections varying in size, profile and weight. Two five-tonne rated overhead cranes running above the individual fabrication bays enable component parts to be brought in safely, as well as taking out completed items prior to being sent for painting or hot-dip galvanising.

Each of the fabrication bays is equipped with welding equipment and tools to undertake a variety of tasks, and is segregated by screens as well as having individual fume extraction so that clean air is maintained in the working area during the welding process.

The new factory has the benefit of a large vehicle yard at the front of the building which ensures the safe unloading and eventual loading of the completed steelwork ready for despatch to customers. Site assembly and erection is on many occasions undertaken by the T H WHITE Projects personnel.

The Projects division produces a wide range of bespoke steelwork, ranging from ladders, stairways, platforms, supporting structures, ductwork and valves, to more complex grain doors, hoppers, bins, mezzanine floors and

New plasma cutter increases speed and precision

overhead gantries and bridge structures. All the work is carried out to ISO 9001 standards and is CE accredited to execution class 2.

T H WHITE Projects specialises in cereal processing & storage solutions of all sizes, from farm & estate installations to large commercial/industrial bulk facilities, taking each project from conception to completion. Visit our new website (thwhiteprojects.co.uk) for an overview of our capabilities – if you have a scheme you would like to discuss, please do contact us on 01380 723040 or email projects@thwhite.co.uk.

Inside the manufacturing area the workspace is divided into bays with overhead cranes.

HARVEST BREAKDOWN & SERVICE

There's enough to think about at harvest time without worrying whether your equipment is going to let you down.

T H WHITE Projects can help with regular servicing and maintenance of driers, cleaners, conveyors,

augers and elevators to ensure they are ready for the busy period. We can supply and fit parts for most makes of equipment, new or old.

If you do suffer a breakdown we can be on the spot fast to get you back in action. Just call our hotline.

MOTOR GROUP

ABARTH 595 TROFEO: A SCORPION WITH ATTITUDE

The 2017 Abarth 595 Trofeo has a 1.4-litre turbocharged petrol engine under the bonnet, pumping out 158bhp and 230Nm of torque propelling it to a top speed of 134mph with a 0-62mph time of 7.3 seconds.

On top of the extra performance, the 595 Trofeo has a lot of extra kit compared to the standard Abarth 595. Larger 17in alloy wheels, perforated front brake discs and Koni rear dampers are complimented by a quad-pipe 'Dual Record Monza' exhaust system which glorifies the soundtrack, adding a real sense of theatre to the drive.

Inside, the sports seats have a perforated design with Abarth stitching, there's a chunky leather-covered steering wheel and a 7-inch touch screen Uconnect infotainment system.

You can get behind the wheel of a 595 Trofeo for as little as £199 a month with a Personal Contract Plan from T H WHITE, which also includes two years complementary servicing. Full details, terms and conditions are available on our website motors.thwhite.co.uk, or by calling 01793 393522.

TOUGH MUDDERS!

A team from T H WHITE's Swindon dealership will be getting very muddy indeed for charity on 20 August.

Simon Chambers, Lyndsey Bennett, Simon Wilson-Gray and Beth James will be competing in a Tough Mudder event in which they will face a testing 13-mile obstacle course designed to take them right out of their comfort zone. They are raising money for the local Swindon Prospect Hospice. This is a great charity supporting over 300,000 people in Swindon, Marlborough and North Wiltshire also the villages of Lechlade and Fairford in Gloucestershire. You can support them at <https://mydonate.bt.com/fundraisers/thwhite>.
