## **Ohashi's compact powerful chippers join T H WHITE's Machinery Imports range.**

The distribution division of T H WHITE already offers some of the best premium products in the professional ground care market and has now added Ohashi Chippers to its leading line up making them the sole UK importer and distributor of this unique little chipper with a timber capacity from 3-6 inches.

Ohashi woodchippers are premium machines of exceptional build quality. The manufacturer was founded in Japan in 1988 and has since developed agricultural and forestry-focused products that are low-impact – providing a high level of performance and low level of pollution. These products are widely used throughout the European market, earning a solid reputation for advanced environmental and safety standards. With this significant success in France, Germany and Italy in recent years, T H WHITE Machinery Imports expects these compact chippers to be as popular here in the UK.

# Wood Chipper ES150GH

Gasoline Self-propelled

- High powered blower dispatch capacity
- Only 73cm wide - it can go through narrow spaces (doors etc)
- Hydraulically powered automatic No Stress infeed rollers
- Maximum power in mobile, compact, light weight body
- Made in Japan - Japanese quality and reliability

Max. diameter <b>15</b> cm	Weight <b>455</b> kg
	Max. output <b>23</b> HP
Size <b>2180 x 730 x 1500</b> mm	

## [Watch the Ohashi Compact Woodchippers in action!](#)

What is amazing about this versatile Ohashi chipper is that it's the most powerful compact chipper in its class. There are other compact, mobile chippers around with automatic infeed, however, none of them chip up to 6 inches (15cm) in wood diameter and none are as compact as the ES151GH Ohashi model!

The obvious advantage is access to jobs and the reduced labour of dragging materials to a collection point of a gated enclosure. With a max width of 720mm, there aren't many side gates or doorways that the Ohashi Chippers range can't pass making them highly manoeuvrable. In addition, Ohashi chippers have the ability to produce a consistently sized and uniform woodchip normally found in larger 35hp woodchippers. This more attractive chipper can negate the need to transport the chip away for disposal as often customers are happy to have the chips remain in their garden as a ground cover to reduce weed growth.

Bill Johnston Director of Machinery Imports shares that "Feedback received from numerous demonstrations confirms that the Ohashi Woodchipper provides a great solution for our contractors, whilst reducing their need for additional labour. We have been able to access the smallest of areas to complete some significant chipping works. Stock has now arrived in the UK and our sales team are busy distributing to a UK wide dealer network."

Find more information on this super-charged Ohashi Chipper range at [ohashi.co.uk](http://ohashi.co.uk), or to book a demonstration contact Ocine Erwee at [ocine.erwee@thwhite.co.uk](mailto:ocine.erwee@thwhite.co.uk) or call +44 7968424032.

--- ends ---

T H WHITE Machinery Imports is a ground care equipment distributor. Part of T H WHITE Group – an engineering services provider specialising in the supply and maintenance of machinery for multiple sectors including agriculture and dairy equipment, groundcare, construction, lorry cranes, grain storage, renewable energy, and fire and security systems. The business has been helping customers get the best from machinery, land and buildings since 1832.
