## **T H WHITE GETS A HEADS UP WITH MACDON**

New Holland dealer, T H WHITE Agriculture, has become a supplier of Canadian draper style combine headers from MacDon. These exceptional headers offer unrivalled harvesting performance, delivering outstanding results and productivity.

Available in sizes up to 13.7m (45ft), MacDon FlexDraper® and Draper headers benefit from more than 70 years' experience making harvesting equipment for farmers on the rich prairie lands of Winnipeg and Manitoba in Canada. A world-leader in harvest technology, MacDon works directly with producers and harvesters in some of the toughest conditions around the world to ensure that its headers deliver worry-free harvesting performance with any crop, in any conditions, and with any major brand of combine harvester.

At the heart of MacDon's design is the instant response Active Float System allowing an extremely close cut without pushing soil. The operator has On-the-Go Control – from the driving seat – of ground pressure, cutting height and fore-aft header tilt, while Active Crop Flow gently places crop on the side drapers heads-first and swiftly moves it onto the feed draper, where it's scooped up into the combine's feeder housing. This promotes peak combine efficiency by saving fuel, improving threshing action, creating better straw distribution, and allowing for a more productive harvest.

At the heart of MacDon's design is the instant response Active Float System allowing an extremely close cut without pushing soil. The operator has On-the-Go Control – from the driving seat – of ground pressure, cutting height and fore-aft header tilt, while Active Crop Flow gently places crop on the side drapers heads-first and swiftly moves it onto the feed draper, where it's scooped up into the combine's feeder housing. This promotes peak combine efficiency by saving fuel, improving threshing action, creating better straw distribution, and allowing for a more productive harvest.

"With harvest just around the corner we are looking forward to starting to retail units as well as the 2019 demo campaign" MacDon's export supervisor Mike Van Den Bosch explained. "T H WHITE Agriculture is the latest addition in a growing dealer network to better serve customers in the UK. MacDon Europe is very excited to work with T HWHITE with their long-standing history, and strong reputation with customers in the region".

Adrian Lovegrove, Operations Director for T H WHITE adds "Upgrading from a traditional auger to a MacDon Draper will increase our customers' productivity this harvest, particularly in damp and moist conditions. This means they can start earlier and work later in the evening than with a traditional solution. These are true multi-crop headers - able to harvest cereals, oil seeds, beans – just about any crop in any condition – and we are pleased to add this solution to our harvest line-up".

T H WHITE Agriculture supplies class-leading machinery brands to local agricultural businesses. Whether you are interested in tractors, combines, balers, implements or service and parts, the expertise from T H WHITE means you can rely on us to help you choose the right machine for your application and ensure that you can keep it running productively for years to come.
